
a
LEVEL 4: Mechanism
Mechanism Findings
1. Differentiating effects of annealing pressure
2. Bimodal effect
3. .....
Identify causal step
LEVEL 3: Experiment Plan
Experiment Steps
Step 4
Sintering the REBCO Target at 920°C for 24 Hours in an O2 Atmosphere ...
Step 10
Gradient Annealing of REBCO Film with Controlled O2 Pressure and Temperature Ramp .....
Explain idea intent
LEVEL 2: Idea
Idea Components
Post-processing optimization
Defect Engineering
.....
Confirm underlying strategy
LEVEL 1: Strategy Tree
Strategy Nodes
Node 1
Node 1.2
Node 1.4
Other Nodes
Node 1.2.1
Other Nodes
b
Growth parameters & Performance
Mechanism Findings
Mechanism A
Trade-off
Mechanism B
Causal Inference & Constrained Parameter Hypotheses
Validation: Multi-modal Characterization
AFM/Surface topography
XRD / Crystal structure
PPMS & MPMS / Performance
Solvability = Findings are Proven by Data
